Autumn Newsletter 2025

It's been another busy summer for the Southern Green team. We have welcomed a new member of staff, work has completed on several fantastic projects, and we have so many more in the pipeline. We are still high as kites following the news of our two Landscape Institute Award nominations and we can't wait to see what the remainder of 2025 has in store! Don't forget to click on the titles for further information.

Welcome Gosia!

We are delighted to welcome Gosia to the SG team. Gosia studied Geography in Edinburgh before heading onto Newcastle to study for a Masters of Landscape Architecture. To find out more about Gosia - click [here](#).

Double Nomination!

The [Landscape Institute Awards](#) is taking place today! Two of our amazing projects are shortlisted in the Excellence in Heritage & Culture category: [Belsay Hall](#) and [South Cliff Gardens](#). We are keeping fingers and toes crossed that the deserving project teams involved bring home a win - good luck to everyone who has been shortlisted!

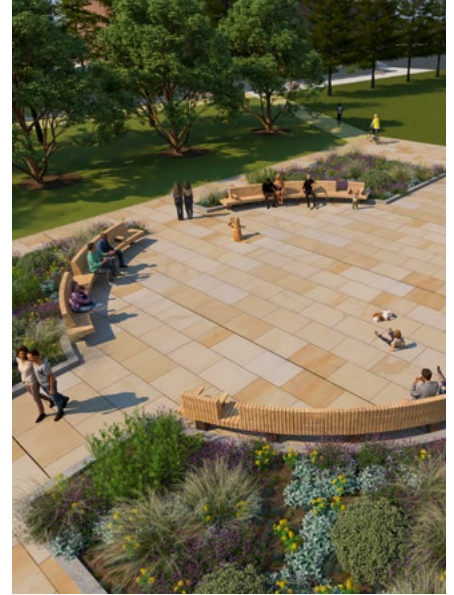

Community Completion

Southern Green worked alongside an amazing team on the [Temperance Square](#) project which recently concluded. The opening ceremony celebrated the creative design, a key focus of which was a welcoming community space to define the entrance to this new hub. We are so excited to see how the site is used in the coming years and feel privileged to have been a part of something that will hopefully give so much back to the local community.

Norwich City-Wide Mapping

Not only have we used innovative aerial photography and software to aid our understanding of each individual site associated with this project, we have also utilised the imagery to help explore the [city-wide strategic approach](#), which is a key element of the project brief. Watch this space for more info on this exciting multi-site project.

Exciting Progress

Updated plans for the Peace Garden within Queen's Gardens, Hull are complete! The visuals below left and above showcase the thoughtful design for this tranquil and reflective space. Accessible bespoke curved perimeter seating will allow for inclusive enjoyment of the city centre space. Stay tuned to see further progress on this scheme.

A Decade of Kynren

We are proud to have been involved with Kynren for many years now. Southern Green started work on Kynren in April 2014 and involvement expanded to include LVIA, landscape masterplanning, public consultation, detailed design and implementation. We have also been involved in further stages of development as the park has expanded to include exciting day park attractions. The Kynren night show attracts a packed audience of around 8000 people at capacity for each show, and visitor numbers are expected to increase as the park expands and diversifies further, with 'Kynren – The Storied Lands', a brand-new historical theme park located within the broader Kynren Park in Bishop Auckland.

Tickets for the 2026 shows are now available, which will be Kynren's 11th year in production. [Click here](#) for more info!
