

Occupational Health & Safety Policy

Southern Green Ltd is a landscape architectural practice that is principally involved in landscape design and appraisal, working in both private and public sectors. We view our Occupational Health and Safety, Environmental and Quality responsibilities as an integral part of our services, processes and activities (such as design and administration etc. of landscape projects).

With this Occupational Health and Safety policy Southern Green states that we are committed to continual improvement, legal compliance and the prevention of injury and ill health. To deliver this policy and its commitments we have created the following objectives:

- comply with relevant legal and other requirements related to occupational health and safety hazards by providing an occupational health and safety register
- prevent injury and ill health by identifying, assessing and managing occupational health and safety risks
- maintain a healthy and safe environment for our employees, sub-consultants and visitors
- provide necessary training to all our employees
- encourage our employees to be involved in delivering this policy
- continually improve our occupational health and safety performance by setting and delivering objectives and targets
- make all employees, sub-consultants and visitors aware of this policy
- upon request make this policy available to interested parties
- review this policy on annual basis with our senior management team
